Science Communication and Journalism

Government of Maharashtra's Ismail Yusuf college organised Interactive session, "From Moon to Sun", on 15- September-2023. The above programme was organized by us with an aim to spread awareness amongst the student community about the recent accomplishments of Indian Space Research Organisation (ISRO); to understand and acknowledge the efforts by our great space scientists; to know more about the futuristic space missions, to explore the career opportunities in space science technology and space journalism.

For this event the renowned space journalist Mr.Srinivas Laxman and first-generation entrepreneur and Science communicator Ms. Ruchira Sawant were invited as resource persons.

The event started with the felicitations of resource persons and guest of honour Prof Bhavita Chavan, Ex-Principal of our college. Discussions took place in a interactive manner where Prof Dr Ketaki Patankar, Head of department, Department of Physics and Dr Anjali Alekar Head, Department of Commerce asked questions to the resource persons regarding Aditya L1 and Chaandrayan missions of ISRO.

Mr. Laxman shared his experience as space journalist, he said that when he was 9 years old his father R.K Laxman, renowned cartoonist had drawn his caricature riding a cycle on the moon. This very picture ignited his curiosity into the space and turned him into a space journalist. Further answering to question he also shared his

enthralling experience of meeting Neil Armstrong, Buzz aldrin, Kalpana Chawla and Sunita Williams. At this juncture, he urged students to find a career in space science and technology as astronauts, space journalist, astrophysicist or astrobiologist.

During course of interaction Ms Ruchira shared her insights as science communicator, while remembering her school days, she suggested students to read Totochand (a book that speaks about values of unconventional education), which made her grow into person with a unique identity. She shared her experience on innovative experiments that she would design with the help of her teachers and how it helped her in understanding its different applications. She also highlighted need of science communication which acts as bridge between researchers and society. She emphasized on the fact that science and technology are refined through research and requires innovation for their progress. Students were impressed by her motivational remarks.

Two student from our sister institute Rajaram college were felicitated on this occasion. They had actively participated and devised a LunaStat in the NASA's Global Lunar Exploration and Expedition International level Mission.

A Senior space scientist Prof Adur present amongst the audience. He gave more knowledge on different space mission and their advantages to the common man. He also clarified the doubts of the students regarding the Aditya space mission.

Finally, Dr Ashish Baina from Department of physics delivered vote of thanks.

Number of Student Participants: 100

Teacher Participant : 15

Convener

(Dr Anjali Alekar)

Co-Convener
